

Dear Applicant,

Congratulations on being offered admission into the MS programme at Syed Babar Ali School of Science and Engineering. Being offered a place here is an achievement of which you can be proud!

The Syed Babar Ali School of Science and Engineering (SBASSE) currently offers MS degrees in biology, chemistry, computer science, artificial intelligence, electrical engineering, digital and embedded systems, power engineering and smart grids, mathematics and physics. Each programme comprises 30 credit hours, spread over core and elective courses. Students can fulfil their degree requirements either by opting for MS-by thesis or MS-by coursework according to the requirements of the selected programme mentioned in the graduate handbook. Each of our MS courses provides a rigorous educational experience where learning takes place through lectures, laboratory work, research projects and frequent interaction with enthusiastic and dedicated faculty members.

SBASSE is a friendly and inclusive community in which you will have the chance to learn many of the latest advances in science and technology from faculty members whose own research is pushing back the boundaries of knowledge. Indeed one of the best things about doing an MS at SBASSE is that you could yourself contribute to this research. Whatever route you take in your MS, though, you will have access to state-of-the-art facilities, and plenty of opportunities to develop both your professional and your personal skills.

I hope that you will find your MS course not just challenging, but also exciting and enjoyable. I look forward to seeing you in SBASSE.

Best wishes,

Dr. Walther Schwarzacher
Ahmed Dawood Chair and Dean
